

STYLE GUIDE · SPRING 2027 · V1

NEW YORK MONSTER *at the Met*

GENTLE MONSTER
× THE METROPOLITAN MUSEUM OF ART

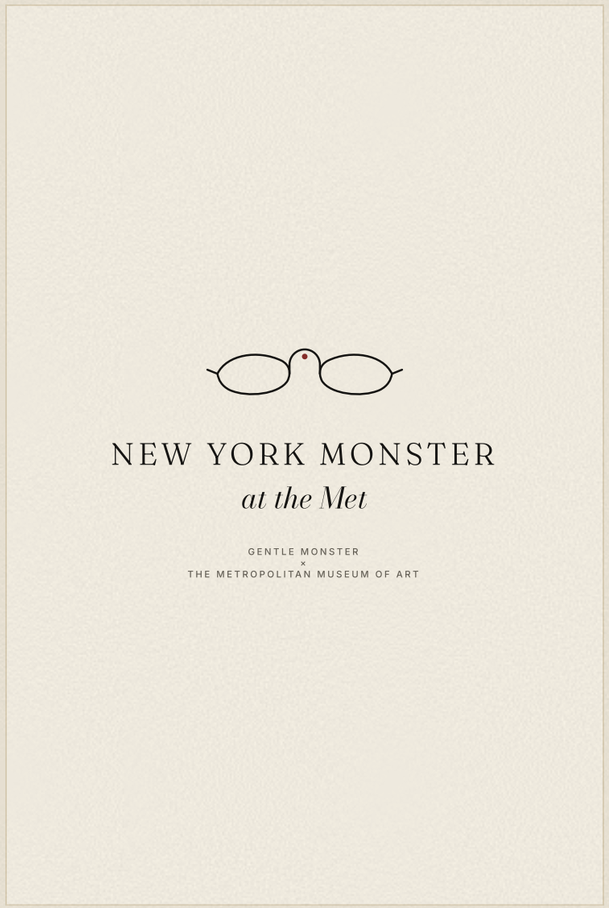

LOOK B

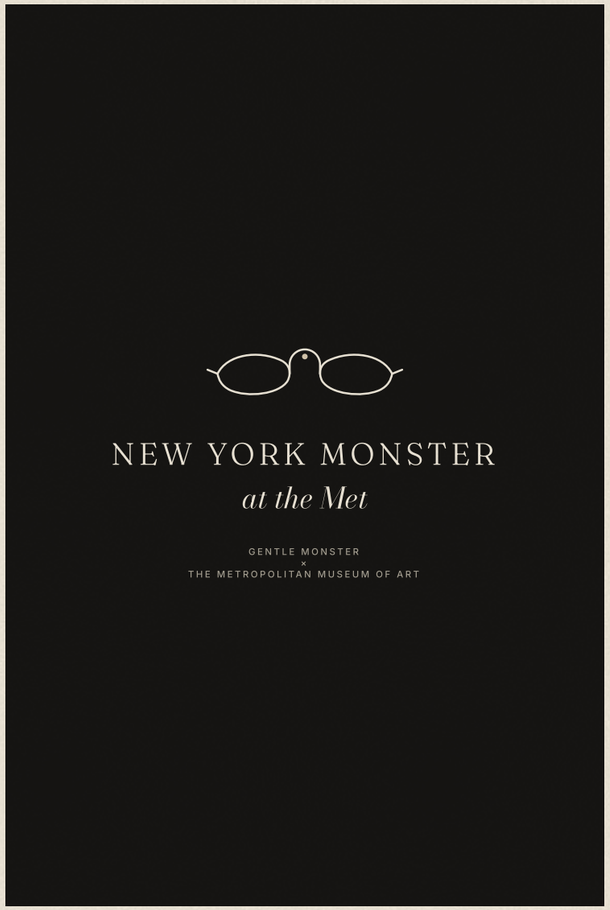

NEW YORK MONSTER *at the Met*

Gentle Monster’s New York drop, made with and for the Met. “Monster” stays in because it’s theirs. “At the Met” puts the collection where it was found: on Fifth Avenue, in the galleries, in front of the sculpture.

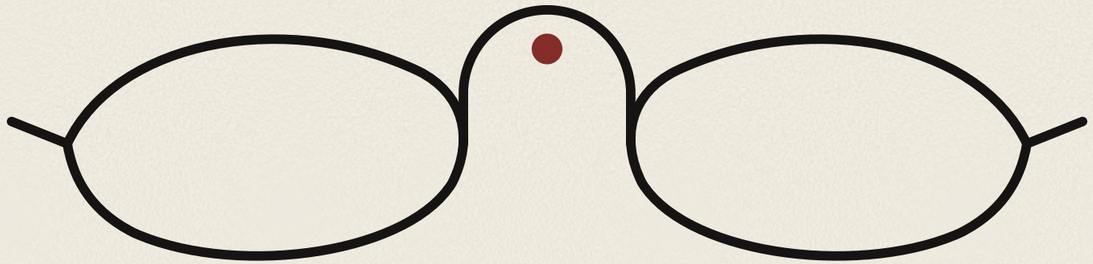

Line: **Look back.** Used once per placement, set in Bodoni italic, never with an exclamation mark.

Name usage: “New York Monster at the Met” in full on first reference. “New York Monster” alone afterward. Never abbreviate to initials.

PRIMARY LOCKUP · ON CREAM AND REVERSED ON BLACK · OFFICIAL GENTLE MONSTER AND MET MARKS TO BE PLACED AS SUPPLIED IN PLACE OF THE TEXT LINE

1 · ALMOND LENS

2 · CLASSICAL ARCH BRIDGE

3 · KEYSTONE DOT

One line, three ideas. The lens is the almond of an Egyptian profile. The bridge is a classical arch, the shape of the Met's entrance and of every gallery door. The dot in the arch is the keystone, and also the eye: the moment the sculpture looks back.

Drawn with a single even stroke so it can be cut from wire, engraved on a temple tip or embossed on the case.

CLEAR SPACE: THE HEIGHT OF THE DOT ×4 · MINIMUM WIDTH: 22 PX OR 8 MM · KEEP THE DOT IN ACCENT ONLY ON CREAM OR LIMESTONE

STONE, SILVER, SHADOW, AND ONE SMALL POP

MARBLE CREAM
#F3ECDD
RGB 243, 236, 221
Ground, paper, case lining

LIMESTONE
#DCCDB2
RGB 220, 205, 178
Secondary ground, panels

SANDSTONE
#B9A486
RGB 185, 164, 134
Warm mid-tone, shadows, packaging

AGED SILVER
#A9ADB3
RGB 169, 173, 179
The metal: frames, hairlines, hardware

PATINA BLACK
#171614
RGB 23, 22, 20
Type, black ground, sunglasses lenses

Use cream, limestone and sandstone for the grounds, silver for anything metal, black for type. The three accents are one per department: faience for Egypt, oxblood for Europe, ochre for Oceania. They never appear together on the same frame.

FAIENCE
#5B8A8C
RGB 91, 138, 140
Accent · Egypt

OXBLOOD
#8C2F2B
RGB 140, 47, 43
Accent · Europe

OCHRE EARTH
#A9693A
RGB 169, 105, 58
Accent · Oceania

60 NEUTRAL GROUNDS
25 BLACK
10 SILVER
5 ACCENT

DISPLAY · FRAUNCES LIGHT

AA

NEW YORK MONSTER

Capitals, tracked wide (+120 to +160), weight 300, optical size at maximum, “soft” and “wonk” off. Used for the name, headlines, region titles.

ACCENT · BODONI MODA ITALIC

Aa

at the Met. Look back.

Sentence case, never tracked. Used for “at the Met”, the line, pull quotes and the voice of the object. Keep to one use per layout.

TEXT · INTER

Aa

PLINTH LABEL · CAPS 11–12 PX

TRACKED +200 · WEIGHT 500

Body copy in regular at 14–16 px, 1.6 line height. Used for captions, label cards, prices and all small text.

PLINTH LABEL
(MUSEUM-CARD STYLE)

PERSEUS

Frame no. 02 · fine silver wire, 2027

After Canova, *Perseus with the Head of Medusa*. The bridge is a laurel leaf. The temples fall like drapery. Worn by a visitor and by the sculpture.

FONTS ARE OPEN-SOURCE (FRAUNCES, BODONI MODA, INTER, SIL OPEN FONT LICENSE) SO THEY CAN BE USED FOR PRINT AND SCREEN

DAINTY, METAL, DRAWN FROM THE GALLERIES

Every frame is hairline silver wire with a single detail borrowed from the Met. Nothing thick, nothing ornamental. The detail does the talking.

KOHL

EGYPT · OPTICAL

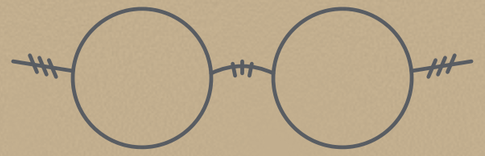

The painted eye line, extended past the corner of the lens.

PERSEUS

EUROPE · OPTICAL · HERO

Laurel-leaf bridge, drapery-fall temple ends. The pair worn by the sculpture.

LASHING

OCEANIA · OPTICAL

Wrapped bindings at the hinge and bridge, after carved, lashed works.

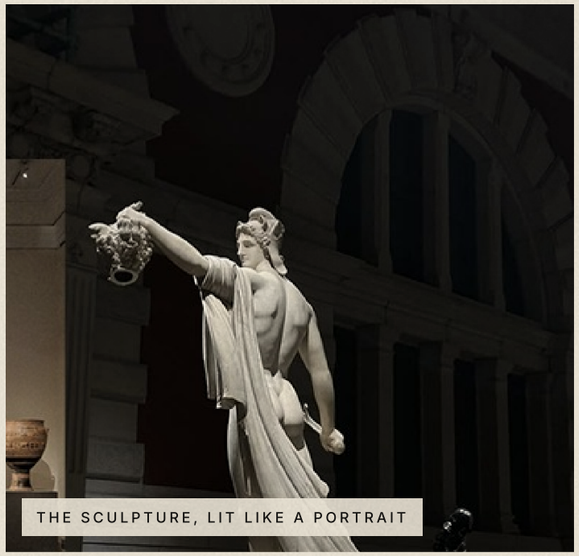

SUN

ALL THREE · SMOKE · BRONZE · CLEAR SILVER

The same silhouettes with tinted lenses.

DRAWINGS ARE CONCEPT SKETCHES OF THE FRAMES; THE PRODUCTION DESIGNS WOULD FOLLOW GENTLE MONSTER'S OWN EYEWEAR ENGINEERING

THE SCULPTURE, LIT LIKE A PORTRAIT

THE CROWD IN MOTION

THE METAL IN SHARP FOCUS

THE STARE, ONE COLOUR BEHIND

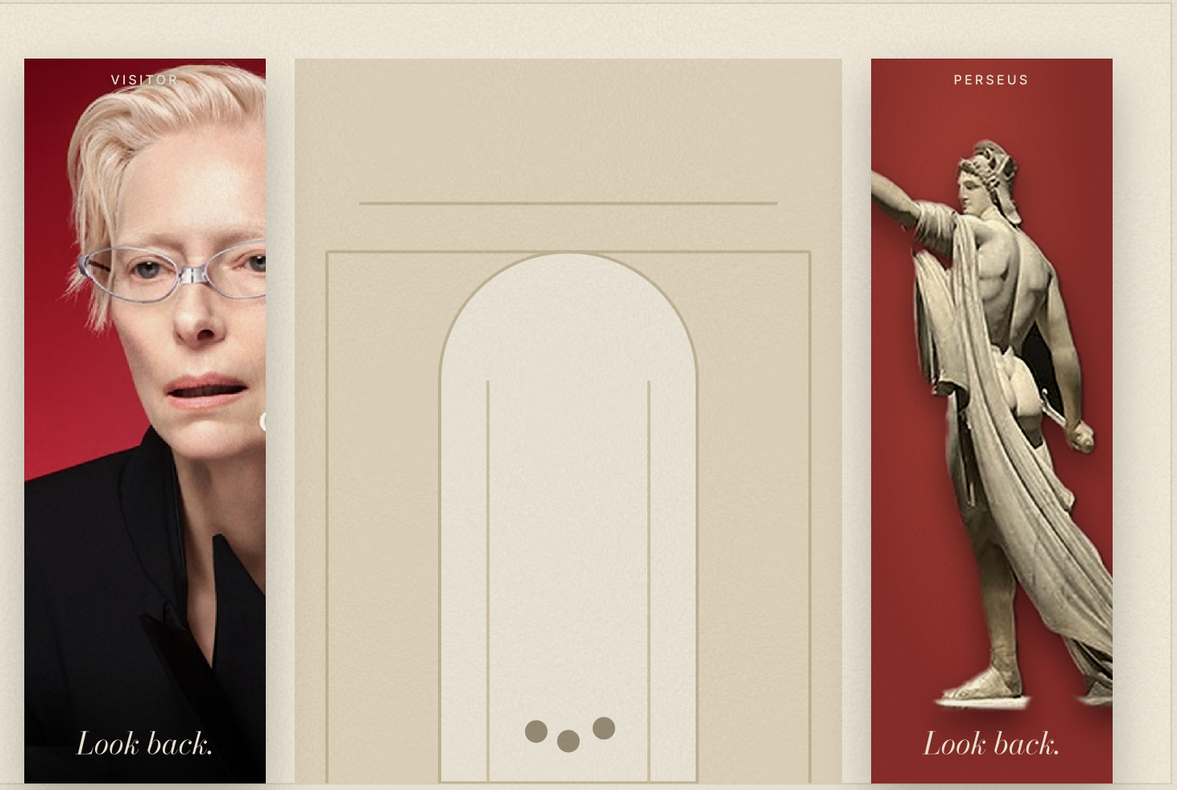

DO

- Shoot and light galleries as they are: low, warm, directional light.
- Put one person in the frame next to the stone. Never a crowd of models.
- Show the crowd as motion blur and the sculpture as completely still.
- Photograph the metal in sharp focus on a calm cream, grey or black ground.
- When the sculpture wears the glasses, treat it as a straight portrait. No smile, no joke in the picture.

DON'T

- Add colour filters, neon, glitter or gradients. The palette stays stone and silver.
- Use stock-style museum shots, tourists with phones or selfies.
- Put text over faces or over the glasses. Type lives on the ground colour.
- Show more than one accent colour in one image.
- Edit the sculpture in any way except the glasses.

PHOTOGRAPHS SHOWN ARE REFERENCE IMAGES FROM THE MOODBOARD, USED HERE AS PLACEHOLDERS

THE DIPTYCH

Two tall banners face each other across the entrance. Left: a visitor in a pair of frames, looking right. Right: Perseus in the same pair, looking left. The line sits at the foot of each banner.

- Same frame, same lens, same light on both sides.
- Faces at the same height so the two stares meet.
- One accent colour per pair, from that frame’s department.
- Logomark at the top of the left banner, endorsement line at the foot of the right.
- Banner format: tall portrait. Final sizes to be matched to the museum’s banner frames.

PLACEHOLDER MOCK-UP USING MOODBOARD PHOTOGRAPHY

DIRECTED BY ME, MADE BY A.I.

I chose the brand, the Met collaboration, the three collections, the hero sculpture, the palette direction and the campaign idea. I made the moodboard photography selection in class. Claude (Anthropic) wrote the brief and the style guide, drew the logomark and frame illustrations as vectors, laid out the moodboard, and revised each piece under my direction.

Logomark and frame drawings are original vector artwork. Photographs are reference images and are not owned by this project. Final photography would be shot or commissioned. Fonts are open source (Fraunces, Bodoni Moda, Inter).
